It is possible to reach this point because we were able to access ``x-amz-meta-`` header: ```` x-amz-meta-ftp-response: '{"x-amz-request-id": "2c5f4a6f3a764d8d7f5c5cbc888e3ba6","x-amz-id-2": "S11BBhv4V0eB7Y37nr3mH2wSk7D8g0s-g6wWiALFKXE7K4amT7El27QLV0g+4P5OKfqMFP2JpLQ","x-amz-meta-comment": "Added by script 1","x-amz-meta-keywords": "test"}'```` For the following samples, we will continue to parse the ``x-amz-meta-`` header to

What's New In PCRunLog?

Runlog is a nice, smart and easy to use running log computer program that makes your log or diary on your computer. The program logs your runs and you can even use several other activities under one profile. Runlog uses your keyboard to log your progress and even uses your voice to initiate your run. You can log runs by distance or time, and even generate graphs and charts out of your runs. Runlog pros: * Great interface * You can use your keyboard to log runs * You can log runs by distance or time * You can use your voice to log runs * You can create graphs and charts out of your runs * You can save your run to a file * You can set the units to miles, kilometers, yards or hours * You can even invite other users to follow your runs * You can even email your logs to friends Runlog cons: * It can get a bit bloated at times It can be hard to know when your run ends. PCRunLog allows you to set the end time of your run, but you can choose if you want the program to detect this automatically. * It can be a little confusing when you want to manually log a run. PCRunLog has a really big interface that can get in the way when you're trying to do this.

7.12 Runlog is a nice, smart and easy to use running log computer program that makes your log or diary on your computer. The program logs your runs and you can even use several other activities under one profile. Runlog uses your keyboard to log your progress and even uses your voice to initiate your run. You can log runs by distance or time, and even generate graphs and charts out of your runs. Runlog pros: * Great interface * You can use your keyboard to log runs * You can log runs by distance or time * You can use your voice to log runs * You can create graphs and charts out of your runs * You can save your run to a file * You can set the units to miles, kilometers, yards or hours * You can even invite other users to follow your runs * You can even email your logs to friends Runlog cons: * It can get a bit bloated at times It can be hard to know when your run ends. PCRunLog allows you to set the end time of your run, but you can choose if you want
